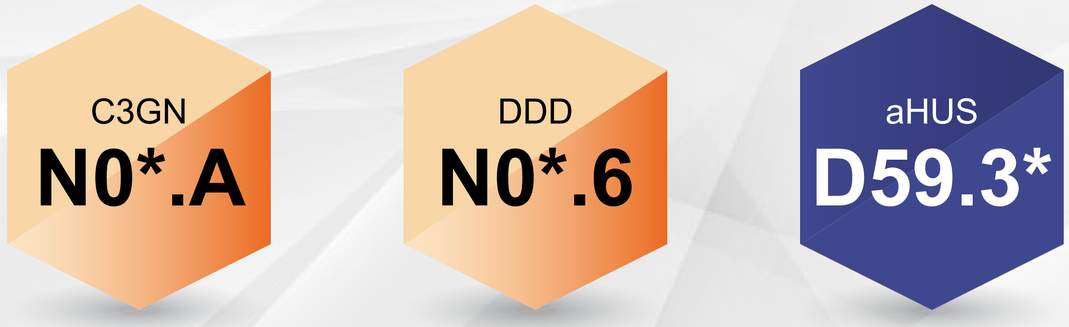
DID YOU KNOW THERE ARE NEW ICD-10 CODES FOR CMKDs?

The release of new ICD-10 codes aims to help address gaps in diagnosis, surveillance, and research of complement-mediated kidney diseases (CMKDs)[1-3]



Between 2020 and 2023, new ICD-10 codes have been launched for C3G (including C3GN and DDD) and aHUS, allowing for greater specificity in coding the unique clinical features that can present with these CMKDs[4]

aHUS, atypical hemolytic uremic syndrome; C3G, complement 3 glomerulopathy; C3GN, complement 3 glomerulonephritis; CMKD, complement-mediated kidney disease; DDD, dense deposit disease; HUS, hemolytic uremic syndrome; ICD-10, International Statistical Classification of Diseases and Related Health Problems 10th Revision.

NEW ICD-10 CODES FOR CMKDs[4]

C3GN

N00.A: acute nephritic syndrome with C3GN
N01.A: rapidly progressive nephritic syndrome with C3GN
N02.A: recurrent and persistent hematuria with C3GN
N03.A: chronic nephritic syndrome with C3GN
N04.A: nephrotic syndrome with C3GN
N05.A: unspecified nephritic syndrome with C3GN
N06.A: isolated proteinuria with C3GN
N07.A: hereditary nephropathy, not elsewhere classified with C3GN

DDD

N00.6: acute nephritic syndrome with DDD
N01.6: rapidly progressive nephritic syndrome with DDD
N02.6: recurrent and persistent hematuria with DDD
N03.6: chronic nephritic syndrome with DDD
N04.6: nephrotic syndrome with DDD
N05.6: unspecified nephritic syndrome with DDD
N06.6: isolated proteinuria with DDD
N07.6: hereditary nephropathy, not elsewhere classified with DDD

aHUS

D59.30: HUS unspecified
D59.31: infection-associated HUS
D59.32: aHUS with an identified genetic cause
D59.39: aHUS (nongenetic)
